Core Measures and Registry Data Abstractor

Description

Performs primary data abstraction duties for Core Measures and registries and ensures high levels of abstraction accuracy for assigned accounts via validation activities. Demonstrates strong communication, documentation, organizing and planning skills to ensure strong leadership of multiple accounts concurrently.

Qualifications

- **One year of data abstraction experience required**
- Experience with at least one registry is desirable: NCDR-CathPCI, NCDR-ICD, GWTG-Stroke, GWTG-Heart Failure, Chest Pain-MI, NSQIP, and/or STS
- Experience preferred in cardiac registries, Get with the Guidelines registries (especially Stroke and Comprehensive Stroke), and Core Measures
- Familiar with medical records, billing/documentation practices, and standard healthcare quality concepts
- Ability to work independently
- Relies on experience and judgment to plan/accomplish goals
- Maintains a strict level of confidentiality in all aspects of work
- Demonstrates a high standard of accuracy and attention to detail
- Excellent interpersonal and communication skills
- Full-time positions with benefits as well as contracting positions available
- BSN, LPN or RN preferred
- CPHQ preferred
